

31 years of customizing seamless pipe fittings up to 42" in outer diameter

Carbon steel pipe elbow,
up to 50t delivered
within 30 days

As the world's water, petroleum and chemical projects get bigger, size matters more than ever. Established in 1980, we've developed equipment to meet this growing urgency by making pipe fittings of immense proportions. Our seamless elbows have been made with outer diameters of up to 42 inches, with walls ranging from two to 120 millimeters in thickness. South America, the Middle East, Asia, Europe and Russia are major importing markets. In China, Sinopec and CNPC have been using our fittings for over 10 years. For samples in one week, order today.
